

# Carbon Reduction Plan

## BROADWAY MALYAN

June 2024

Broadway Malyan is committed to achieving Net Zero emissions by 2050.

### Baseline Emissions Footprint

Broadway Malyan's baseline emission year is 2022-2023. This is the organisation's first reporting period.

Baseline year emissions: 2022-2023	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	28.76 tCO <sub>2</sub> e
Scope 2	50.33 tCO <sub>2</sub> e
Scope 3 (Included Sources)	521.05 tCO <sub>2</sub> e
Total Emissions	638.51tCO <sub>2</sub> e

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next 7 years to 348.38 tCO<sub>2</sub>e by 2030. This is a reduction of 55%

Progress against these targets can be seen in the graph below:

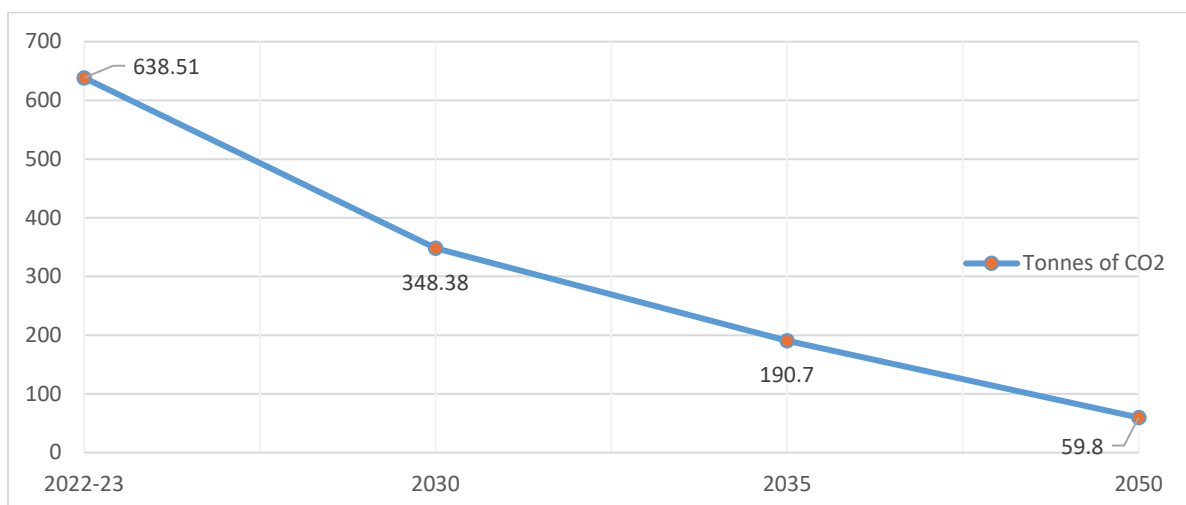

Figure 1: Broadway Malyan UK decarbonization pathway for Net Zero 2050 - SBTi aligned

## Carbon Reduction Initiatives

The environmental management measures and projects are being planned to reduce our carbon impact against the 2022-2023 baseline in the short term. The 3-yr predicted carbon reduction impact through these schemes are approximately 65 tCO<sub>2</sub>e, a 11%ge reduction against the baseline and the measures will be in effect when performing the contract. These measures include

1. Switching of energy suppliers to our offices to be sourced from renewable energy and phasing our gas heating.
2. Working with the landlords of our offices to improve energy efficiency of the offices
3. Behavioural changes such as wearing season appropriate clothing, monitoring heating & cooling setpoints etc.
4. Conduct supply chain engagement to liaise, improve systems and data collection methods
5. Internal training in for all locations in carbon reduction measures

In the future we hope to implement further measures such as low carbon travel planning, planning to reduce home working impacts, occupancy-based assessments and office space rationalisation, ensuring lease contracts include green clauses, and choosing efficient buildings when moving offices and improving waste and water management processes.

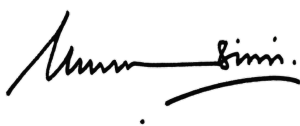

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting. Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

### Signed on behalf of Broadway Malyan:

Group Director of Sustainability
